

AGROFAT2000 (SL)

Composition:

β - NAPHTHOXYACETIC ACID (BNOA).....	3, 5%
GIBBERELIC ACID (GA)	0,1%

Product description:

Agrofata2000 is a liquid plant bio-stimulant composed by plant hormones (auxin and gibberellin), absorbed both by roots and foliar. Formulated as soluble concentrate (SL).

This hormonal product encourages fruit set and increases fruit size, avoiding the formation of hollow fruit.

Benefits using Agrofata2000:

- Encourages fruit set.
- Increases the size of the fruit.
- Stimulates increased production.

Hormonal Product

- Prevents the formation of hollow fruit.
- Slightly stimulates root formation.
- Stimulates and accelerates metabolism and cell division of tissue.
- Promotes stem elongation and expands the sheet surface thereby enhancing the photosynthetic activity of the plant.
- Promotes the accumulation of metabolites in the phloem and cambium activation.
- Prevents the formation of deformed fruits and limits the damage caused by frost during flowering.
- Improves the taste of the fruit.

Applications on crops:

Our product can be used in a wide range of crops

CROPS	TIME OF TREATMRNT	DOSE
Vegetables in general	In full bloom	0,5 – 1 L/ha
Grains and cereals	At the stage of the pin	0,5 L/ha
Fruit trees in general	In full bloom	1 – 2 L/ha
Banana tree	In full bloom	0,5 – 1 L/ha

Containers:

We serve our product in different packed. (If you are interested in another type of packaging do not hesitate to contact us)
