PHOSPHORUS PENTOXIDE (P ₂ O ₅).....	20%
POTASSIUM OXIDE (K ₂ O).....	13%
BORO (B).....	0,5%
GA3.....	0,15.%
NAA.....	0,05%

Product Description:

G&G PRODIGY is a product enriched with hormones formulated as soluble powder with red color. Our product provides to the plant an optimal development during the growth period and increases the crop flowering providing longer lasting lush blooms. The hormone content in one hand favors the formation of natural defenses by the plant to be very useful in stress conditions for cultivation, while on the other hand greatly increases the thickness of the plant cell.

G&G PRODIGY benefits:

The great content in NPK elements plus Boro enhance vegetative and root development. Giving to the crop a great nutrition program that materializes in a better and higher quality crop production

The light quantities of this both hormones (GA3 and NAA) enhance lightly flowering and fruit set and provide to the plant protection against stress conditions.
