## Product description:

Tesol-K correct the present or any hidden deficiency of secondary and trace elements. His composition formed by potassium in conjunction with a trace element chelated by EDTA gives this product a fantastic corrector power for a wide range of crops. This product apply adequate elements in plant-available form, required for protein synthesis and chlorophyll production. It is suitable to be applied directly or used as raw material for formulation.

## Tesol benefits:

- Increase absorption and transportation efficiency of micronutrients inside plants.
- Essential many enzyme systems, particularly those associated with grain, seed and fruit formation, due to potassium content.
- Increase yield and improve quality significantly.
