

SUPER FOLTOP (SP)

Composition:	P/P
PHOSPHORUS PENTOXIDE (P ₂ O ₅).....	46%
POTASSIUM OXIDE (K ₂ O).....	40%

Product Description:

Super Foltop concentrated fertilizer is formulated as a soluble powder of high solubility. It is a 100% fertilizer potassium phosphonate, which leads to improvements in crop vitality against adverse external conditions. This fertilizer is recommended for both extensive and intensive crops.

Regardless of the application form (foliar or via soil), Super Foltop is easily absorbed by the plant because it has a systemic effect both via ascending and descending.

Super Foltop benefits:

- The phosphonate ion enhances the natural defense systems of plants against attack by alien organisms.
- The high content of phosphorus and potassium, helps to correct the excesses of Nitrogen in crops, improving aspects such as sugar content, fruit set and fruit maturation and enhancing withering of shoots.
